STRUCTURED CABLING

S.A.Services. provides data and voice cabling installation and design-assist services for all types of major construction projects, while offering a fully equipped service fleet prepared to meet the demands of your daily moves, adds, and changes

S.A.Services has the personnel and the equipment to perform virtually any type of structured cabling task. Just a few of these technical Capabilities include

- **Copper/Fibre/Riser Laying & Termination**

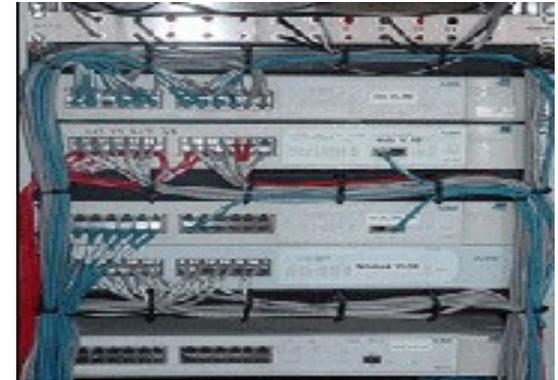

Networking Engineering

For Networks, **S.A.Services** have the Capabilities internally to design, install and maintain any Communications network providing a total solution. For existing networks, **S.A** can provide Hardware/software upgrades maintenance Agreements to enhance their performance

Call us and we will arrange for one of our network professionals to meet with you and discuss your existing and future network requirements

- Copper/Fiber/Coax Workstation Installations
- Fiber Polishing/Fusion Splicing (SC/LC/ST)
- Fluke/Penta/OTDR Testing & Troubleshooting
- Rack/Stack LAN Hardware
- 24/7 Service Fleet
- AutoCAD/Visio Documentation

Our IT capabilities include:

- Bandwidth management
- Wireless solutions
- Management solutions
- Network audit and (Needs) Analysis
- Network design, upgrades and solutions
- Network installation
- Network maintenance, troubleshooting and fault finding

- Novell installation and management
- Windows NT design and installation
- Radio Links
- Microsoft
- Maintenance agreements
- Voice over IP
- Switch configuration

S.A.Services. Qualified System/Network Engineers are up to date with

the latest
Products and technologies.

We install

- Hubs
- Routers
- Bandwidth Management
- Copper cable
- Fiber
- Workstations
- Servers
- Client Computers
- Peripherals
- Microsoft Software

Also, we can provide a total turnkey solution .

Telephone Solution

From design to implementation, we provide complete solutions that make servicing you easy. Integration solutions include PBX, VoIP, Call Center applications, and Voicemail integration.

Audio/Video

Audio/Video Solution

Our firm is built on quality engineering practices, reliable and timely project Delivery, and full service repair and systems training. Our expertise is in audiovisual Presentation systems, sophisticated sound and lighting, video conferencing, Professional video and video security.

- Design/Build
- Systems Integration
- Technology Renovations and Upgrades
- Maintenance

- Corporate AV Presentation Systems and Video Conferencing
- Video Security, CCTV

RELATED SERVICES

POINT-TO-POINT WIRELESS WIDE AREA NETWORK (WWAN) FEATURES

- Extend existing Fibre connections
- Last Mile access where fibre can't reach
- Enable redundancy to existing Fibre
- Supports Data, Voice and Video applications
- Unlicensed, Digital Spread Spectrum radio, 11Mbps to 1Gbps (2.4GHz and 5.8GHz)
- Licensed Digital Microwave radio, up to 100Mbps (18, 23, 24 and 38GHz)
- Supports all major Ethernet protocols
- Distances up to 15 miles
- Immune to environmental interference
- SNMP Management
- Repeater Configurations Supported
- MAC Layer Bridge with IP Routing option

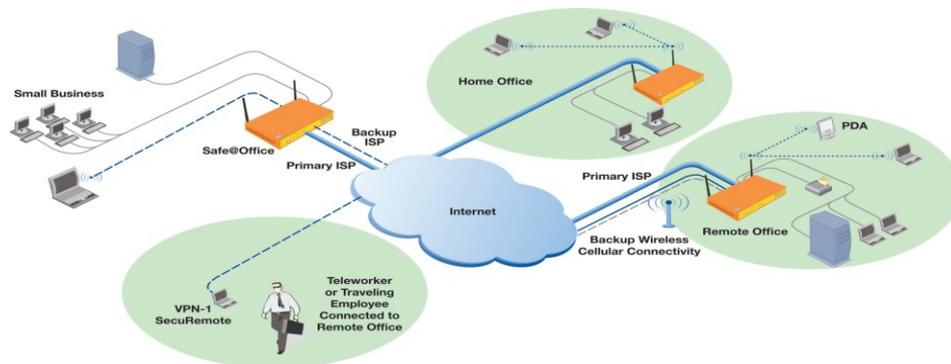

Wireless LAN/WAN

Think you have to move dirt to connect those buildings? Maybe Not. We provide wireless wide area network (WWAN) and wireless local area network (WLAN) solutions for Industrial, Educational, Medical, Commercial, and Government markets. We will analyse your networking needs, perform an on-site survey, design the solution, build required structures, install the equipment - even provide on-going maintenance and support of your wireless network.

For WLAN applications, we provide reliable, high-speed wireless Data connectivity, allowing mobility and flexibility within the work environment. Whether you're moving employees, adding additional workspace, or just don't have time for new cable installation, high-speed wireless networking is the answer

Our high-speed point-to-point and point-to-multi-point WWAN solutions provide safe, secure, and reliable Data, Voice and Video connectivity between buildings at distances up to 15Km. All without recurring monthly charges

Wireless Local Area Network (WLAN) Features

- Extend existing wired local area networks to hard to cable areas
- Eliminate Move, Add, Change expenses
- Enable roaming in and around your facilities
- Combine Wireless Data and Voice over the same Wireless Network
- 11Mbps-2.4GHz; IEEE 802.11b compatible
- 54Mbps-5.8GHz; IEEE 802.11a compatible

Electronic Security

How do you integrate emerging technologies with an effective electronic security system? For today's clients, answering this question correctly is more critical than ever. We have trained professional for designing, installing and maintaining superior integrated electronic security systems. Our highly trained project managers, CAD engineers, MCSE software technicians, electronic technicians and sales staff are capable of providing our clients with systems that will significantly increase security awareness and effectiveness

The following is a listing of systems and products for which we provides full integration

Access Control

- Biometric Solutions
- Smart Card Solutions
- Parking Controls
- Human Resource Integration

Closed Circuit Television Systems (CCTV)

- Fixed Cameras
- Dome Cameras (360°)
- Matrix/Switching Systems
- Others

Digital Video Recording Systems

- Digital Video Recording

Intercoms

- Talk-A-Phone
- Stand-alone Systems
- Devices Utilizing Your Existing PBX
- Emergency Call Stations

Computer Solution

We have complete range of Acer/HP/COMPAQ/IBM Servers Desktop PC

Laptops, LCD Monitors, Projectors etc.

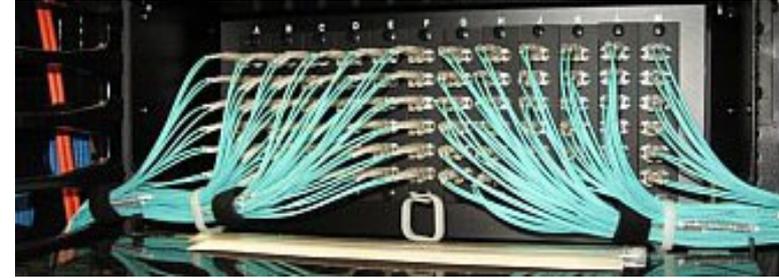

We provide full service on any existing computer, troubleshoot any system problems as well as service most Fortune 500 office servers / workstations and printers and most small office/home office units, etc. We also build custom computers designed to fit your needs. We troubleshoot and evaluate most crashed systems and crashed hard drives and offer "same day" and "after-hours" emergency service. For

your convince, we will come to your location to minimize your down time. We service and repair most brands, makes and models of computers, notebooks, and

laptops as well as most software

Solution

- Perform diagnostics on PCs and peripheral equipment to troubleshoot problems- down to -component level.
- Install/upgrade PC components such as motherboards memory chips, network cards, disk drives, modems, and CD-ROM drive.
- Configure PC memory and network drives.
- Configuration, assembly, and testing computer system MS & Servers.
- Provide customized hardware and software solutions to fit customer's requirements.
- Maintain and repair all operation systems such as: Windows 9X, Windows 2000, Windows XP, Win NT.
- Service & Repairing of all type of Laser/Inkjet/Dt Matrix Printers
Pickup & Delivery Facility

Services & Support

S.A.Services. recognize that a turnkey network involves careful analysis of your unique business goals, and technology needs.

Certifications

- Microsoft Certified Solution Provider
- KRONE Certified Engineer
- SYSTIMAX Certified Engineer
- Cisco Certified Network Analysis

Design - For WAN & LAN Design, a specialized process is utilized to deliver the most comprehensive solution to meet your networking requirements:

- Data Line connectivity Options
- Operating System capabilities
- In-depth Network Hardware capabilities
- Multi-Vendor Environments
- General Technical Staff Augmentation

INTEGRATED RACK AND

Cable Management Accessories

2U Horizontal Cable Organizer

1U Horizontal Cab Organizer

Patch Cord Organizer

Cable Management Rings

Accessories

Power Distribution

RM LCD Monitors

KVM Switches

Fixed Shelves

Sliding Shelves

Keyboard Drawers

Keyboards

Implementation Management - Our experienced team can assist with large comprehensive projects for specified periods of time:

- Network Implementation
- Facility Relocation
- Network Expansion
- Multi-Vendor Environments
- General Technical Staff Augment

Support, Service, & Maintenance - We are committed to keeping your productivity high, and the only way to stay productive is making sure all equipment runs smoothly without interruption:

- We know & understand that your applications are mission-critical, and work to minimize your downtime and maximize your efficiency.
- During troubleshooting a complete analysis is documented to determine the issue, whether it is the LAN, WAN, router, configuration, network utilization, hardware failure or device driver related.
- Keeping your equipment running in tiptop shape is easy with our regular preventative maintenance programs.
- Our certified technicians expertly maintain and repair your machines to keep them humming along and keeping your ROI high.

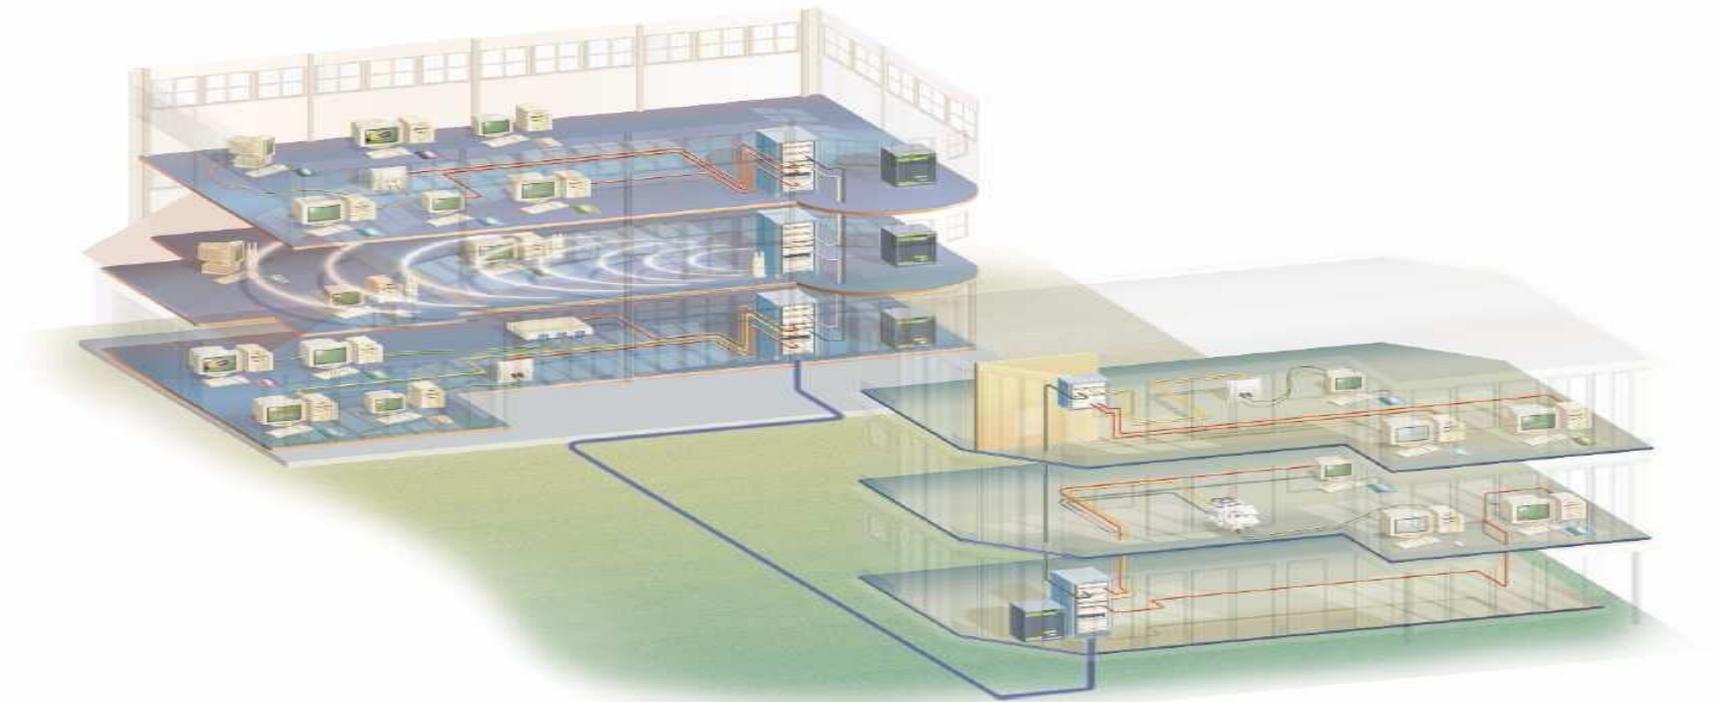

We hold the necessary certifications to enable **S.A.Services** to keep the task of maintenance under our umbrella of services, all from a single point of contact for you.
